EDUCATION

M.Sc. Management & Technology
TU München, Germany (from Oct 26)

Coursework - TU München
TU München, Germany (Oct 25 – Sept 26)

- Kurse: Grundlagen Datenbanken, Operations Research

B.A. International Business & Management
FH-Münster, Deutschland (Sept 22 – Apr 24)

- Grade : 1.5 (very good)

B.A. International Business Administration
(D.U.E.T.I. / D.U.T.)
IUT Lyon 1, Frankreich (Sept 19 – Aug 22)

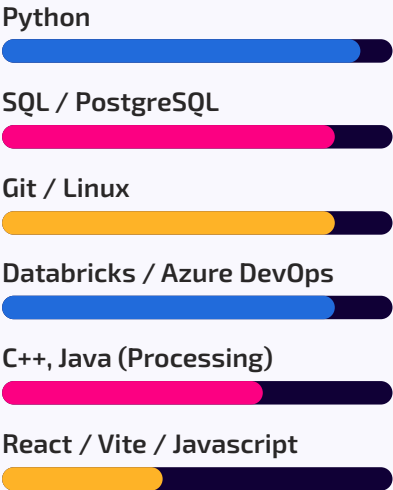

- Grade : 16.5–16.9/20 (very good)

TECHNICAL SKILLS

Production: Python · R · SQL / PostgreSQL · Databricks · Azure DevOps · CI/CD · Git · Linux/WSL

Building: React + Vite · Node.js + Express · Docker · JavaScript · HTML/CSS

Other: C++ · Java (Processing)

LANGUAGES

EXPERIENCE

Risk Models & Analytics — Working Student
MEAG Munich - Munich, Germany (Sept 24 - Sept 26)

- Independently redeveloped a **liquidity scoring model** (*Liquiscore*), reimplementing an existing R codebase in Python on Databricks, including instrument-specific scoring logic and SQL-based data sourcing
- Co-led design and development of a **credit-risk ETL pipeline** (*PRIME*) in **Python + PySpark**, replacing a legacy MS Access solution — built without direct senior-developer oversight
- Designed a **medallion architecture** (bronze/silver/gold) with object-oriented table abstractions, integrated into Databricks Jobs
- Built the **full testing pipeline**: mock-data generation (CSV/Parquet), unit tests (unittest / pytest), tox config, and CI integration; authored technical docs with Sphinx
- Prepared the codebase for IT handover (environment-agnostic, secrets/config-based parameterization); version control via **Git**, **PRs**, and **Azure DevOps**

Hackathon — Yellow VC / Project A / TUM.ai
Hackathon - Munich, Germany (Apr 26)

- 2nd place; built a backend end-to-end in 24h (FastAPI, PostgreSQL, SQLAlchemy, Pydantic) — first backend project
- Repo: [View code](#)

PROJECTS

Portfolio Website
2024 - ongoing

- React + Vite + GitHub Actions -> GitHub Pages
- Hosted auf github.io - [View Website](#)

Unifin - Multi-Bank ETL & Dashboard
2026 (in progress)

- OFX/TSV -> CSV converter (2 banks); bridges frontend with real data-parsing logic
- Repo: [View Code](#)

CREA — Accountability Platform
(planned Q3 2026)

- React · Node + Express · PostgreSQL · JWT · Docker · CI/CD · Railway
- Full-stack app for small accountability groups; covers auth, persistent DB, containerised deployment, CI/CD
- Repo: [View Code](#)
